Wire Journal International 1986 article index

Companies or individuals may arrange for reprints by contacting Wire Journal at Wire Association headquarters.

Association news

"Association announces 1986 seminar lineup," January 1986, p. 18.

"We've come a long way," February 1986, p. 23.

"Nonferrous/Electrical meeting set for Montreal," February 1986, p. 27.

"Jacksonville to host Ferrous Divisional Meeting," February 1986. p. 4.

"Wire Association International 1986 Committee Rosters," February 1986, p. 36.

"A fiberoptics section," March 1986, p. 19.

"Two technical sessions planned during Nonferrous/Electrical Divisional Meeting," March 1986, p. 20.

"Lawn luncheon added to Ferrous Divisional Meeting program," March 1986, p. 22.

"The momentum continues," April 1986, p. 24.

"Management committees schedule sessions during Ferrous Divisional Meeting," April 1986, p. 29.

"The international outlook," May 1986, p. 18.

"Nonferrous/Electrical meeting attracts 248," June 1986, p. 20.

"Joint European Regional Meeting planned for September," June 1986, p. 24.

"What is the question," July 1986, p. 14.

"Ferrous Divisional Meeting brings 255 to Jacksonville Hilton," July 1986, p. 16.

"56th Annual Convention & Exhibition, Chicago Hilton and Towers," July 1986, p. 20.

The Metals Source. OmniSource.

OmniSource is a diversified metals marketing and processing company offering wide range of options to corporations nationwide.

OmniSource will purchase, toll or sell scrap, shapes, and refined copper. And OmniSource has the capability to convert scrap copper in any form—bare, tinned, insulated, enameled—into copper cathode or rod.

Get In Touch With The Source.

Change Spools Without Tools

Now exclusive, low-cost Quik-Loc eliminates time-consuming wrenches and set screw collars in the loading and unloading of spools or reels for wire, cable, tapes, ribbons, cords and similar products.

Fast and Easy Positive Holding	Slips on or off shaft, using only finger pressure to unlock. Tested to lock spools up to 500 lbs. in weight securely on shaft.
Cut Costs Wide Application	Eliminates costly chewed up shafts. Installs on shaft sizes: ⅜", ½", ⅝", ¾", ⅞", 1", 1¼", 1⅜", 1⅞", 1½", and 2".
Rugged Design Standard Length Instant Retrofit	OD's of all Quik-Locs are ½" larger than shaft diameter. Standard 1¾" length eliminates shaft modifications Simply slide on shaft.

Quik-Loc is the easy, economical way to upgrade pay-off operations on drawing machines, despoolers and respoolers. Write or call for data sheet and price list.

Quik-Loc Co.
FWL Division
1765B Acushnet Avenue, New Bedford, MA 02746

Hudson Automatic introduces a new wire bending machine with a patented CNC control, that proves two heads are better than one!

MONTORFANO VIRE 2 AS + EE

These are the features that put us 'heads' and shoulders above the competition:

1. A seven axis CNC on-board computer with video monitor VDU.
2. A memory that can retain data up to 99 programs for as long as 10 years without battery.
3. Three dimensional bending.
4. Can be made fully automated for unmanned operation.
5. Produces an infinite number of bends with only one or two bending units.
6. Four bending units (more can be added).
7. Patented slide and rotary units.
8. Flexible programming of all functions.
